## Aluminum Mirror Glass

KAVEH GLASS INDUSTRIAL GROUP

# Aluminum Mirror Glass

## Description

KAVEH GLASS AL-Mirror is made of high quality clear or tinted float glass. Our hi-tech coating equipment is able to produce high reflection mirrors. The clear surface and brightness of the mirror giving distinct and real image. Using the latest vacuum magnetron sputtering technology, lets the aluminum atoms splash and deposit on the clean float glass surface in the vacuum chamber, which this technology has totally changed traditional production process and technology level of aluminum mirror. After aluminum coating is done, back of the glass will be coated with two layers of protective paint. Since Aluminum Mirror is copper and lead free, it can be a good version of ecological mirror which will not cause heavy metal contamination during usage.

## Features

- Less black dots and more durable compared to the traditional aluminum mirror.
- No distortion; Clear and real image with true color.
- Copper free; will not cause environmental heavy metal contamination.
- Can be used for more than 15 years in case of indoor furniture application.

## Applications (Indoor use only)

- Fitness clubs
- Decoration and furnishment
- Rearview mirror of automobiles
- Raw material for producing cosmetic and sanitary mirror
